Peijing Li

peli@stanford.edu | (515) 715-3989 | https://www.linkedin.com/in/peijing-li
1300 East Ann Street, 5104 Couzens Hall, Ann Arbor, MI 48109-2016

EDUCATION

Stanford University — Stanford, CA
[INCOMING] **Doctor of Philosophy in Electrical Engineering** — Starting Sep 2024
Research Interest: Computer architecture, energy-efficient and robust hardware systems

University of Michigan — Ann Arbor, MI
Bachelor of Science in Engineering in Computer Science — Aug 2020 – May 2024
Minor in Civil Engineering; College of Engineering Honors Program

- *Cumulative GPA:* 4.0/4.0 with 156 credit hours completed.
- *Standardized Testing:* TOEFL: 116/120; GRE: 166/170V, 170/170Q, 5.0/6.0W
- *Upper-level electives:* Computer Architecture, Advanced Compilers, Computer Security, Computer Vision, Software Engineering, Transportation Engineering, Linear Optimization

EXPERIENCE

ASML Silicon Valley — San Jose, CA
Software Test Engineer Intern — May 2023 – Aug 2023

- Performed software quality assurance tests on focus exposure modeling software to optimize the performance of photolithography scanners
- Developed Python scripts for automating the narrow-down process of bug discovery and synchronization of manual test analysis reports with qTest databases

University of Michigan Department of Civil and Environmental Engineering — Ann Arbor, MI
Instructional Aide in CEE 375 — Sensors, Circuits and Signals Course — Jan 2023 – Apr 2023

- Lead lab section for class of 10 students in experiments on signal processing and Arduino programming
- Held twice-weekly office hours to help students with homework and other course-related questions

University of Michigan Transportation Research Institute — Ann Arbor, MI
Research Assistant, Biosciences Group — Feb 2022 – Aug 2022

- Developed computer vision system for monitoring body postures of occupants of Level-3 autonomous vehicles
- Constructed multi-body models of vehicle occupants in MATLAB and Mathematica based on 3D body scan data
- Composed review article of research trends in digital human models

Dell EMC — Shanghai, China
Software Engineering Intern, Research & Development — Jun 2021 – Aug 2021

- Automated testing procedures with repository of ~10 Python and Perl scripts for the VMware Cloud Foundation
- Decreased time spent on lifecycle management testing on datacenter software by up to 50%
- Collaborated with team through Confluence and Jira to deliver two major software releases over three months

SKILLS

- *Programming Skills:* Python, Pytorch, C/C++, x86/ARM/RISC-V Assembly, LLVM, SystemVerilog
- *Additional Computer Skills:* Docker, Confluence, Jira, Bamboo, MATLAB, SUMO, OMNet++
